

Kraftstoffsysteme
Fuel Systems

Hinweise zum Katalogaufbau

Notes about the Structure of the Catalogue

Inhalt – Dieser Katalog enthält Produktinformationen für den Bereich Kraftstoffsysteme der Marke Siemens VDO.

Gliederung – Im ersten Teil finden Sie Informationen zum Unternehmen Siemens VDO Trading GmbH und zu seiner Produktmarke Siemens VDO.

Der folgende Produktteil ist gegliedert nach den verschiedenen Produktgruppen. In den einzelnen Kapiteln befindet sich eine Übersicht über alle Produkte mit den jeweiligen Informationen sowie einer Fahrzeugmodellübersicht. Anschließend werden im Kapitel Produktverwendung die einzelnen Produkte den entsprechenden Automarken und Typen zugeordnet. Falls erforderlich, sind die Zuordnungen mit Informationen versehen, die die Verwendung einschränken können (Datum, Motorcode, Fahrgestellnummer, usw.). Die Referenzliste am Ende des Kataloges sortiert die einzelnen Produkte nach ihren OE- bzw. Artikelnummern.

Abkürzungen und Symbole – Eine Übersicht über alle im Katalog benutzten Abkürzungen und Symbole finden Sie in der Ausklappseite am Ende des Kataloges.

🔄 **Bitte beachten:**

Einsatzgebiet – Die im Katalog genannten Produkte sind für den Einsatz in erdgebundenen Fahrzeugen, Motoren und Anlagen konzipiert.

Haftungsausschluss – Die Daten in dem Siemens VDO Trading GmbH Ersatzteilkatalog wurden zum Zwecke der Darstellung des Ersatzteilangebotes von Siemens VDO Trading GmbH nach bestem Wissen erstellt und aufbereitet. Technische Änderungen, Irrtümer und Auslassungen bleiben vorbehalten. Die Angaben sind für Lieferbarkeit unverbindlich. Eine Haftung für die Angaben im Siemens VDO Trading GmbH Ersatzteilkatalog, egal aus welchem Rechtsgrund sind ausgeschlossen, soweit nicht Vorsatz oder grobe Fahrlässigkeit vorliegt.

Contents – This catalogue contains product information about fuel systems from the Siemens VDO brand.

Structure – The first section contains information on the company Siemens VDO Trading GmbH and its product brand, Siemens VDO.

The subsequent product section is divided up according to the different product groups. In the individual chapters there is an overview of all products, with appropriate information, as well as a vehicle model overview. The individual products are then allocated to the corresponding vehicle makes and types in the chapter entitled Product Applications. If required, the allocations are provided with information which can limit the utilization (date, engine code, vehicle chassis number, etc.). The reference list at the end of the catalogue sorts the individual products according to their OE and Article Number.

Abbreviations and symbols – An overview of all the abbreviations and symbols used in the catalogue can be found on the fold-out page at the back of the catalogue.

🔄 **Please note:**

Application – The products described in this catalogue are designed for use in land vehicles, engines and equipment.

Disclaimer – The data in the Siemens VDO Trading GmbH replacement parts catalogue has been compiled and processed to the best of our knowledge for the purpose of presenting Siemens VDO Trading GmbH replacement parts range. Subject to technical alterations, errors and omissions. The details are not binding for the availability. We cannot be made liable for any legal reason for the details in the Siemens VDO Trading GmbH replacement parts catalogue, as long as there is no intention or gross negligence involved.

Siemens VDO Trading GmbH Siemens VDO Trading GmbH

Siemens VDO Trading GmbH ist die Handelsorganisation der Siemens VDO Automotive AG. Mit dem Hauptsitz in Deutschland hat die Siemens VDO Trading GmbH Tochtergesellschaften und Distributoren in weltweit über 80 Ländern.

Das Produktportfolio reicht von Navigations-, Car-Multimedia- und hochwertigen Car-Audio-Systemen, Pkw- und Nutzfahrzeug-Ersatzteilen wie Benzin-Förderpumpen bis zu Tachographen, der Ersatzteilversorgung nach Serienauslauf, Flottenmanagement-Systemen und Special-OEM-Serien für Industrie- und Marine-Produkte.

Siemens VDO ist die Produktmarke für Original-Marken-Ersatzteile. Ihre Angebotspalette umfasst Kraftstoff- und Regelsysteme, Scheiben- und Scheinwerfer-Reinigungssysteme, Stellelemente für Zentralverriegelungen sowie Sensoren.

Die Marke Siemens VDO liefert kundenorientierte, innovative und vor allem praktische Lösungen in Erstausrüster-Qualität. Damit steht Siemens VDO für Kompetenz bei Original-Marken-Ersatzteilen.

Beste Qualität und bester Service

Dank eines konsequenten Qualitätsmanagements ist Siemens VDO Trading GmbH nach DIN EN ISO 9001 zertifiziert. Zudem erfüllen die Produkte alle Anforderungen des deutschen und internationalen Straßenverkehrs.

Siemens VDO Trading GmbH is the trading arm of Siemens VDO Automotive AG. Headquartered in Germany, Siemens VDO Trading GmbH has subsidiaries and distributors in over 80 countries worldwide.

Our product and services portfolio ranges from navigation, car multimedia and sophisticated car audio systems to vehicle replacement parts such as fuel supply pumps and tachographs, end-of-series replacement parts provision, fleet management systems and special OEM products for industrial and marine applications.

Siemens VDO is the product brand for genuine brand replacement parts, including fuel supply and control systems, screen and headlight washer systems, actuators for central locking systems and sensors.

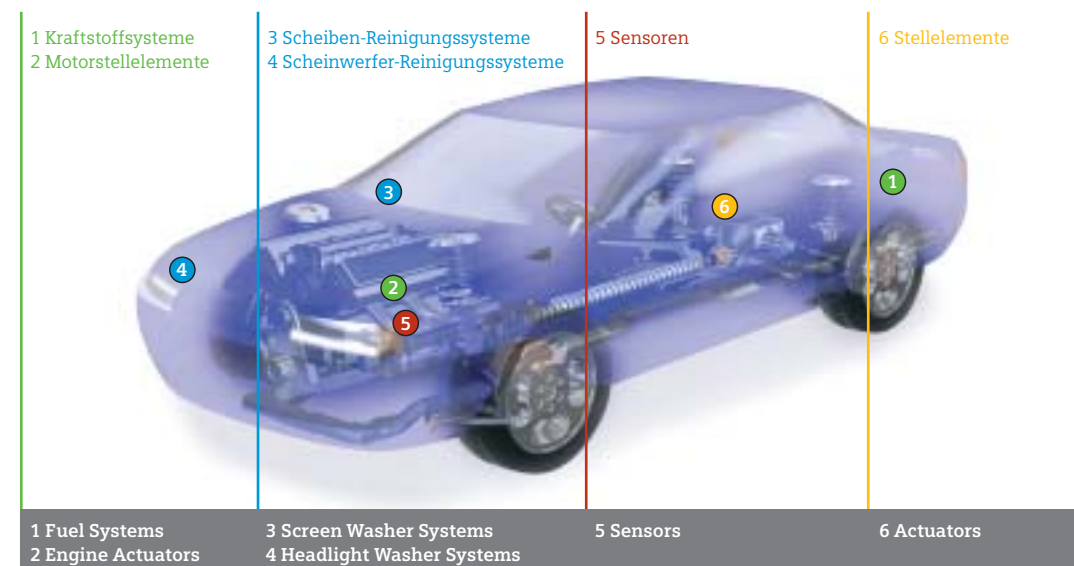

The Siemens VDO brand supplies customer-focused, innovative and, above all, practical solutions featuring original equipment quality. Siemens VDO – delivering expertise in the field of genuine brand replacement parts.

Outstanding quality and outstanding service

Thanks to stringent quality management, Siemens VDO Trading GmbH has DIN EN ISO 9001 certification. In addition, our products meet all road traffic regulations relating to the German and international markets.

Quality Management System
DIN EN ISO 9001

Kraftstoffsysteme von Siemens VDO Fuel Systems from Siemens VDO

Damit's immer richtig läuft

Voraussetzung für das Funktionieren eines Fahrzeugs ist Kraftstoff im Tank. Ohne ihn läuft kein Motor. Aber ein voller Tank nützt nichts, wenn nicht gleichzeitig eine zuverlässige Kraftstoffversorgung vom Tank in den Motor gewährleistet ist. Siemens VDO Kraftstoffsysteme bieten dies in höchster Qualität.

Leerlauf der Pumpen, verschmutzte Kraftstoffe oder Fehler an der Fahrzeugelektrik können zum Ausfall einzelner Komponenten oder schlimmstenfalls des gesamten Systems führen. Siemens VDO Original-Marken-Ersatzteile ermöglichen dann einen reibungslosen Austausch mit geringem Montageaufwand und Top-Qualität.

Das Lieferprogramm umfasst:

- Kraftstoffpumpen | Fördereinheiten
- Kraftstoffvorrats-Sensoren
- Kraftstoff-Druckregler

Keeping the wheels turning

Having fuel in the tank is crucial to vehicle operation. Without it the engine simply won't work. But a full tank of fuel is no use if the fuel supply from tank to engine isn't totally reliable. High-quality Siemens VDO fuel supply systems offer that assurance.

Idle running of pumps, contaminated fuel or faults in the vehicle electrics can lead to failure of individual components or, in a worst-case scenario, to failure of the entire system. Siemens VDO genuine brand replacement parts then enable trouble-free replacement with low installation outlay and top quality.

The product range includes:

- Fuel Pumps | Fuel Supply Units
- Fuel Level Sensors
- Fuel Pressure Regulators

Kraftstoffpumpen Fuel Pumps

6

Die im Tank montierten elektrischen Kraftstoffpumpen/-Fördereinheiten der neuen Generation gewährleisten eine permanent zuverlässige Kraftstoffförderung zum Motor. Sie werden als In-tank-Pumpen für Verbrennungsmotoren mit Einspritzanlage zur Benzin- oder Dieselförderung eingesetzt. Ein Rücklauf führt nicht verbrauchten Kraftstoff zurück zum Tank.

Die Hauptfunktionen sind:

- Kraftstoffversorgung der Einzel- oder Zentraleinspritzanlage mit spezifiziertem Druck und Durchfluss nach Einschalten der Bordspannung
- Systemdruckerhaltung in der Kraftstoffversorgungsleitung bei allen Betriebszuständen.

Kraftstoffpumpen

Die Kraftstoffpumpe ist Bestandteil einer Kraftstoff-Fördereinheit, die im Tank betrieben wird. Zum Teil ist die Pumpe innerhalb der Fördereinheit in einem Schlingertopf verbaut.

Die Kraftstoffpumpen sind zum Teil mit einem Filter ausgestattet.

The electric next-generation fuel pumps/fuel supply units that are installed in the tank, guarantee a permanently reliable supply of fuel to the engine. They are employed as in-tank pumps for combustion engines, with injection systems for petrol or diesel supply. A return-flow returns unused fuel to the tank

The primary functions are:

- Fuel supply of the individual or central injection system, with specified pressure and throughput, after switch-on of the in-vehicle voltage
- System pressure retention in the fuel supply line at all operating conditions

Fuel Pumps

The fuel pump is a component of a fuel supply unit sited in the tank. Within the supply unit, the pump is sometimes installed in a swirl pot.

Fuel pumps are sometimes equipped with a filter.

Kraftstoff-Fördereinheiten Fuel Supply Units

Kraftstoff-Fördereinheiten

Die Kraftstoff-Fördereinheit besteht in der Regel aus der Kraftstoffpumpe (z. T. mit Schlingertopf), einem Filter und dem Flansch mit den entsprechenden Anschlüssen. Zusätzlich kann die Fördereinheit mit einem Hebelgeber ausgestattet sein, bzw. kann in Kombination mit einem Tauchrohrgeber zum Einsatz kommen.

Fuel Supply Units

The fuel supply unit generally consists of the fuel pump (sometimes with swirl pot), a filter and flange with corresponding connections. In addition, the supply unit can be equipped with a lever-type sensor and can be used in combination with an immersion tubular-type sensor.

Hebelgeber Lever-Type Sensors

Die Messung des Tankinhaltes erfolgt mittels Sensoren (Hebel-/Tauchrohrgeber), die entweder mit der Pumpe eine Einheit bilden oder aber separat verbaut sind.

Hebelgeber

Hebelgeber dienen zur Messung des Kraftstoffvorrates in Verbindung mit einem elektrischen Anzeigegerät.

Funktionsweise

Die Flüssigkeit des zu messenden Vorrates trägt einen Schwimmer, der bei Niveauänderung sinkt oder steigt und dabei über einen Hebel eine Schleiffeder auf einer Widerstandswicklung oder einem Dickschichtwiderstand bewegt. In beiden Fällen erfolgt eine Anpassung an die Tankkennlinie.

Ein der Flüssigkeitshöhe entsprechender Widerstandswert wird eingestellt. Die Größe des jeweiligen Widerstandswertes wird mit einem elektrischen Anzeigegerät gemessen und in Vorratswerten angezeigt. Bei einigen Gebern liegt die Masse am Gehäuse an. Andere Geber sind massefrei, d. h. die Masse wird über einen separaten Anschluss zugeführt.

Hebelgeber können zusätzlich mit einem Warnkontakt ausgestattet sein, um neben der kontinuierlichen Messung das Erreichen eines Füllstandgrenzwertes (Reserve) zu signalisieren.

The measurement of the fuel tank content is implemented by means of sensors (lever-type/tubular-type sensors), which either form one unit with the pump or are installed separately.

Lever-Type Sensor

Lever-Type sensor, in association with an electrical indicating device, are used for the measurement of the fuel level.

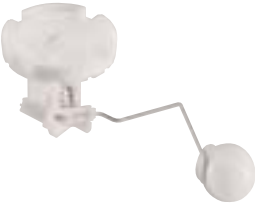

How they work

The liquid of the fuel level to be measured contains a floater, which rises or falls when the level changes and, by means of a lever, then causes a brush wiper spring to be moved on a resistance winding or a thick-film resistor. In both cases, an adaptation to the tank characteristics is implemented.

A resistance value, which corresponds to the liquid level, is set up. The value of the respective resistance is measured with an electrical indicating device and displayed in terms of fuel level values. With some transmitters the grounding is attached to the casing. Other transmitters are without grounding, i.e. the grounding is routed over a separate connection.

Lever-Type sensors can be additionally equipped with a warning contact, in order to signal the attaining of a filling level limit value (reserve), as well as for continuous measurement.

Tauchrohrgeber Tubular-type Sensors

Tauchrohrgeber

Auch Tauchrohrgeber dienen zur Messung des Kraftstoffvorrates in Verbindung mit einem elektrischen Anzeigerät.

Funktionsweise

Die Flüssigkeit des zu messenden Vorrates trägt einen Schwimmer, der mit dem Flüssigkeitsniveau sinkt oder steigt. Dabei gleiten am Schwimmer befestigte Kontaktfedern über zwei parallel zur Schwimmbewegung verlaufende Widerstandsdrähte und stellen einen der Flüssigkeitshöhe proportionalen Widerstandswert ein. Die Größe des jeweiligen Widerstandswertes wird mit einem elektrischen Anzeigerät gemessen und in Vorratswerten angezeigt.

Die zu überwachende Flüssigkeit gelangt durch eine Flutungsbohrung in das Schutzrohr. Dadurch wird die Ein- und Ausströmungsgeschwindigkeit und die Übertragung von kurzzeitigen Schwankungen des Flüssigkeitsniveaus (z. B. Kurvenfahren oder Bremsen) auf den im Schutzrohr befindlichen Schwimmer gedämpft.

Bei einigen Gebern liegt die Masse am Gehäuse an. Andere Geber sind massefrei, d. h. die Masse wird über einen separaten Anschluss zugeführt.

Tauchrohrgeber können zusätzlich mit einem Warnkontakt ausgestattet sein, um neben der kontinuierlichen Messung das Erreichen eines Füllstandgrenzwertes (Reserve) zu signalisieren.

Tubular-type Sensors

Immersion tubular-type sensors are also used for measurement of the fuel level, in association with an electrical indicating device.

How they work

The liquid of the fuel level to be measured contains a floater, which rises or falls when the level changes. Contact springs, which are attached to the floater, slide over two resistance wires running parallel to the floater movement and set up a resistance value which is proportional to the liquid level. The value of the respective resistance is measured with an electrical indicating device and displayed in terms of fuel level values.

The liquid to be monitored reaches the conduit through a flood boring. By this means, the inflow and outflow speed and the transmission of short-term variations of the liquid level to the floater contained in the conduit (e.g. due to in case of cornering or braking) is dampened.

With some transmitters the grounding is attached to the casing. Other transmitters are without grounding, i.e. the grounding is routed over a separate connection.

Tubular-type sensors can be additionally equipped with a warning contact, in order to signal the attaining of a filling level limit value (reserve), as well as for continuous measurement.

Der Kraftstoff-Druckregler ist am Ende des Verteilerrohres angebracht und hält den Kraftstoffdruck auf einem konstanten Wert. Im Metallgehäuse des Kraftstoff-Druckreglers gibt eine federbelastete Membran beim Überschreiten des eingestellten Druckes den Rücklaufkanal frei. Dadurch kann überschüssiger Kraftstoff zum Kraftstoffbehälter zurückfließen.

The fuel pressure regulator is attached at the end of the distribution pipe and keeps the fuel pressure at a constant value. Located in the metal casing of the fuel pressure regulator there is a spring-loaded membrane, which allows the opening of the return-flow channel if the set pressure is exceeded. In this way, surplus fuel can flow back to the fuel tank.
